*Election/Restrictions*

This application contains claims directed to the following patentably distinct species of the claimed invention:

- I. FIG. 5 drawn to upstream and downstream flow gates construction used in a disk drive.
- II. FIG. 7-1 drawn to an upstream flow gate construction with an inwardly directed flow pattern toward a disk spindle used in a disk drive.
- III. FIG. 7-2 drawn to an upstream flow gate construction with an outwardly directed flow pattern away from a disk spindle used in a disk drive.
- IV. FIG. 8 drawn to a flow gate construction with a plurality of flow gates disposed between adjacent discs.
- V. FIGS. 12-13 drawn to a flow gate construction that is peripherally mounted about a plurality of discs.

Upon election of one of the implemented flow gates supports within the disk drive, the Applicants are further required to elect among the following subspecies of flow gates:

- A. FIGS. 2-1, 2-2 and 9 - a flow gate having a honeycomb like structure.
- B. FIGS. 3-1, 3-2, 3-3, 10 and 11 - a flow gate having parallel fins.

Art Unit: 2652

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable and additionally identify any generic claims.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the
